SUBJECT: Record of Telephone Conversation with
Mr. Kerry Tyson of Eastern Diversified Metals Site

FROM: Francisco Barba, EPM F.B.
PA CERCLA Remedial Enforcement Section (3HW12)

TO: File

On July 27, 1987, I had a telephone conversation with Mr. Kerry Tyson. Mr. Tyson works for Todd Giddings and Associates, Inc. Mr. Tyson indicated during our telephone conversation that the sample of sludge taken from the site's waste water treatment plant digester unit was representative of the sludge presently transported from the site for disposal. In addition, Mr. Tyson indicated that the intercepted water that passes through the waste pile is channeled directly into the treatment plant and not into the holding lagoon.
